OCTANE™ Graphics Board Hardware and Software Designations

This flyer describes the hardware and software designations for the OCTANE PCI graphics boards. Graphics boards include the:

- SI and SE boards
- SSI and SSE boards
- MXI and MXE boards

The E boards look identical to the I boards, but provide better performance. To determine which board is installed in your system, type **`hinv`** in a shell window and look for a line similar to the following:

```
Graphics board: ESI
```

ESI is the designation for the SE board. See the following table to determine the software designations for the various boards.

Table 1 Software Designations for OCTANE Graphics Boards

Board Type	Software Designation
SI	SI SI with texture option
SE	ESI ESI with texture option
SSI	SSI
SSE	ESSI
MXI	MXI
MXE	EMXI
