

October 15, 2002

Dear Valued Customer,

Congratulations on your purchase of Storage Partitions for your SGI® Total Performance 9400 [TP9400] or SGI® Total Performance 9500 [TP9500] Fibre Channel storage system. Storage Partitions lowers your total cost of storage ownership by allowing you to share your RAID subsystem resources across multiple server platforms, thereby consolidating storage requirements.

The feature has been activated on your system. Please review the Release Notes prior to using Storage Partitions.
